Introduction

A knife is a valuable tool to have when on a camp, expedition and for certain activities. There are many different types and sizes of knives. As with all tools the right type of knife should be used for the job or work being undertaken. In addition to safety there are also legal considerations when carrying a knife which must be understood and followed.

For the purposes of this policy Beaver Scouts, Cub Scouts, Scouts and Young Leaders will be referred to simply as Young People. Beavers and Cubs are most likely to come into contact with kitchen knives, ranging from cutlery to small paring knives and larger utility knives. Young People may encounter Swiss Army (folding) penknives, sheath knives, locking and clasp knives and multi tools. In all cases it is important that, before using any knife, the individual is taught how to use it safely, the rules concerning when and where it can be carried and the kind of jobs the various types of knife should be used for.

The Group's Policy on Knives

As with all activities, we are governed by the Scout Association's Policy Organisation and Rules, which can be found on their [Website](#), and their specific guidance on knife activities can be found via the links at the end of this policy.

The following summarised key points are:

The law

The Criminal Justice Act 1988 describes what is considered to be an offensive weapon and Section 139 details what knives are banned and what knives can be carried and in what circumstances:

- In general, it is an offence to carry a knife in a public place without a good reason, this may include Scout camp sites and activity centres
- It is illegal to use any knife in a threatening way
- It is not illegal to carry a folding knife (non-locking blade) in public provided the length of the cutting edge of the blade does not exceed three inches (7.62cm)

Rules

- The law, as summarised above, will be followed by all members of the Group.
- Young People should not bring a knife to an activity or camp unless specifically requested to do so, if knives are needed for an activity they will normally be provided by the Group.
- Knives will be transported securely to and from activities by an adult.
- No Young Person will carry a knife without the specific permission of a leader present at the activity.
- No Young Person will carry a knife with the blade exposed (the blade should always be folded away or sheathed).
- Knives will only be carried when the activity dictates that they are likely to be needed.
- Young People will be trained in the use of a knife before using one. Training in the use of one type of knife does not mean the Young Person is trained in the use of all knives.
- While using a knife Young People will be supervised by an adult at all times.
- When not in use knives should be put away and secured in the possession of an adult.
- Knives will not be stored in Young Person's tents.
- Where possible knives will be stored in a location that can be locked (e.g. boot of an adult's car, storeroom, site office, etc.)
- Throwing of knives is not permitted
- Knives must not be worn with uniforms except for religious reasons
